

Ali Khurram is a Professor and Honorary Consultant Pathologist at the University of Sheffield. Following his graduation, he pursued a masters in Experimental Oral pathology at Queen Mary University, London and continued his academic training by completing a PhD in 2008, at the University of Sheffield. After numerous years as a junior trainee in oral and maxillofacial pathology, medicine and surgery, he went on to gain an NIHR-funded academic clinical lecturer training post obtaining his FRCPath in 2016 and has held a consultant post in Sheffield since then. Alongside his clinical work, Professor Khurram has founded a research group called NEOPATH that looks at the application of artificial intelligence to head and neck pathology, as well as understanding the biological processes behind head and neck cancers and dysplasia. Ali works closely with numerous patient groups and is actively involved in teaching- through academic undergraduate and postgraduate teaching at the University of Sheffield, in addition to clinical teaching and training at local, regional, national and international level. He is the Secretary for the British Society for Oral and Maxillofacial Pathology (BSOMP) and the Digital Adviser for the Pathological Society of Great Britain.
